📍 Cooch Behar, India

PROFESSIONAL SUMMARY

Data Science graduate specializing in **exploratory data analysis (EDA)**, **machine learning pipelines**, and **RAG implementations**. Proven ability to design and deploy scalable, intelligent applications using **Python**, **Django**, and **FastAPI**.

WORK EXPERIENCES

Industry Intern - Web Dev (Django + AI) | Internship

Aug 2025 - Nov 2025

Euphoria GenX Pvt. Ltd. (Brainware University)

Hybrid • Kolkata

- Developed an AI-integrated expense management system using Python/Django, applying MVT architecture and 8+ REST APIs to reduce manual data entry by 85%.
- Completed a 3-month industry internship in Python/Django web development with AI integration, earning dual certifications from the industry partner and university.

Technologies / Skills Used : Python, Django, REST API

Machine Learning Intern | Internship

Feb 2025 - Mar 2025

Indus Net Technologies

Hybrid • Kolkata

- Developed an end-to-end **sentiment analysis pipeline** using **Python**, **Pandas**, and **Scikit-Learn**, achieving **87%+ model accuracy**.
- Improved model performance through **iterative preprocessing and hyperparameter tuning**, with real-time evaluation and visualized performance reporting.

Technologies / Skills Used : Python, Pandas, Scikit-Learn

PROJECTS

Resume Parser with RAG | Github

Architect

- Developed an intelligent resume parsing tool using a RAG pipeline, **reducing manual screening time by up to 85%** through an LLM-powered conversational interface.
- Utilized **Python**, **Streamlit**, **LangChain**, and **FAISS** to enhance functionality and performance.

Technologies / Tools Used : Python, Streamlit, LangChain, FAISS

Housing Price Prediction

Developer

- Built a machine learning model to predict housing prices, achieving **89% prediction accuracy** through feature engineering and hyperparameter tuning.
- Deployed the model as a REST API using FastAPI, enabling **real-time price inference** for downstream applications.

Technologies / Tools Used : Python, FastAPI, Scikit-learn

Daily Expense Manager | Github

Developer

- Developed a full-stack **personal finance application** with **AI-powered financial insights** to help users manage and monitor their finances
- Implemented expense categorization across **10+ spending categories** and AI-driven budget recommendations based on users' spending patterns

Technologies / Tools Used : Python, Django, React.js, SQLite3

Predo - Attendance Predictor | Github

Developer

- Developed an interactive attendance prediction application using **Pandas** and statistical modeling to analyze attendance data and forecast future trends across **10+ attendance records**
- Created 5+ **Matplotlib visualizations** to highlight attendance patterns and make statistical insights easier to interpret
- Integrated the prediction model into a user-friendly **Streamlit UI**, enabling peers to interact with forecasts for **semester planning and attendance management**

Technologies / Tools Used : Python, Streamlit, Pandas, Matplotlib

SKILLS

Programming & Query Languages : Python, SQL, C++
Libraries : Pandas, Numpy, Scikit-learn, Langchain
Frameworks : Django, FastAPI, React, Streamlit
ML & AI : RAG, Machine Learning
Data Analytics : Data Analysis, Excel, EDA
Data Visualisation : Tableau, Matplotlib, Seaborn
Databases : PostgreSQL, MySQL, SQLite
Tools & Platforms : Git, GitHub, Postman
Soft Skills : Problem Solving, Communication, Teamwork
Languages : English, Hindi

EDUCATIONS

Brainware University |

2022 - 2026

B.Tech - CSE (Data Science)

- Graduating with **8.6/10 CGPA**.

Cooch Behar Rambhola High School, WBCHSE |

2020 - 2022

Higher Secondary (12th)

- Completed Higher Secondary** with **82%**.

Maharaja Nripendra Narayan High School, WBBSE |

2018 - 2020

Secondary (10th)

- Completed Secondary** with **84%**.
